[No. 2]

November 17, 1944

...FEED SUPPLY SITUATION...

Supplies of oilseed meals will be materially larger this month than in October because of seasonal increase in production. November shipments from crushers are expected to amount to 438,000 tons.... an increase of 65 thousand tons over October. Shipments to the north-eastern states in November are placed at more than 44 thousand tons. This will be supplemented by the War Food Administration's allocation of 5000 tons to the same area. This means that there will be about 5000 tons more than there was available last month. More wheat millfeeds were available in the market but prices remained at ceiling. Corn feeds were in larger supply but hominy feeds were only in fair request and selling under ceiling prices in the Chicago area.
